Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in June 2005 and no WBCR was observed. The stream met the maximum depth criteria at 2 of 8 sites and the average depth criteria at 2 of 8 sites evaluated. The depth criteria was met at the 2 most downstream sites. No interviews were conducted. Due to the increasing depth of the stream, the committee recommends that the WBCR designation be retained from site 006 downstream, and removed from site 005 upstream.

**Committee Recommendation:** ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
